Length Considerations

DoorStyles

The factory will fabricate your Shangri-La DoorStyles Shading to the exact length ordered when the vanes are in the open (or view through) position. When the vanes are tilted to the closed position, the shading will become 1³/₄" longer. When closed on an inside mount or when used with hold down brackets, a slight puckering may occur.

Standard Shadings Comfortex will fabricate your window shading to the exact length ordered +/- 3/8" when the vanes are in the open or view-through position. However, because the vanes rotate when closing, the shading will become 3/8" longer in the closed position. If closed and not raised, a slight puckering can occur on the lower most sheer section.

Shipping Charges - Comfortex will ship all orders for fabricated shades freight free via UPS, FedEx Ground or other similar method within the continental United States. Shades with widths of 98" or more or do not meet the size and weight requirements of UPS or FedEx Ground are required to ship by motor freight. A \$65.00 Common Carrier surcharge will be added for all orders shipped within the continental United States which required to ship by motor freight. A per unit transportation surcharge will be added to all orders. See freight policy at www.comfortexdealers.com for more details and for freight policy for Hawaii and Alaska.
